

## Use of Existing Resources

### Existing Resources

Incorporating existing material into Bb Learn can make the development of your online course much easier. Gather all your course notes, PowerPoint presentations, tests, links and other materials in a central location. Even if they are not yet in web-ready form, the more resources you have to draw from, the faster the design and development process will be.

**Rogue Online (Bb) Course Activity:** Examining Existing and Needed Resources.

Indicate what content you currently have, it's current format (Word, PowerPoint, HTML, handwritten, etc.), and what content you will need in developing your online course.

	Have (indicate format)	Need	N/A		Have (indicate format)	Need	N/A
Syllabus				Lecture notes			
Calendar				PowerPoint presentations			
Web site links				Textbooks			
Lab materials				Quizzes			
Assignments				E-packs			
Activities, discussions, projects				Multimedia materials			

Other resources that are important for the course

Things to consider and discuss in the development process:

- How easily can the existing resources be converted into a Web format? (ie: HTML, GIF, JPEG) Do you have permission to place them on the web?
- How difficult will it be to create or acquire the resource that have not yet been developed
- Will the combined cost of creating the material outweigh the benefit?
