

Science, Faith, and Climate Change: Earth Week Lunch and Learn

Join us on RVC campus from 12-12:30PM in HEC-127/129 for informational presentations and free lunch during Earth Week, April 16-18th.

Monday, April 16

Dominick Dellasala, Ph.D, President & Head Scientist, GEOS Institute

Avoiding FUBAR on Climate Change: Mother Earth Needs Us to Act

FUBAR is a WW II term used for when things are so messed up they are unrecognizable. This is the Earth we are headed for due to human-caused climate change. There is still time to act by switching to clean energy sources and protecting forests. This will be a provocative talk to stimulate interest in taking action for the Earth.

Tuesday, April 17

Rev. Caren Caldwell, United Church of Christ

Creation Justice: A Christian View of Climate Change

How do Christianity and science coexist? In what ways does Christianity include an environmental ethic? What is the Christian motivation for caring for the earth and acting to solve climate change? This talk will explore these questions.

Wednesday, April 18

Jon Raybourn, Medford BLM

Climate Weirding, White House Rhetoric, and Public Land Policy

The growing body of science behind Global Anthropogenic Climate Change (GACC) seems to many scientists to be undeniable. Yet climate change denialists have been effective in dismantling the federal regulatory framework. A recent example of changes in the management of gas and oil production is worth studying to connect the dots between our process and the people.
